

Counter Units Type „O“ for Slickline and Wireline Units

Description

Accurate depth measuring is a fundamental requirement for successful Wireline operation. Leutert Meters are most accurate, durable and cost-effective, and they are fully compatible with all Leutert Wireline units as well as most other manufacturers' Units. Depend on Leutert's Wireline expertise to be sure you get the appropriate Meters and Indicators for your specific application.

The „O“ measuring device is equipped with a light weight spring balanced rack arm assembly which allows the measuring device to move freely with the line while spooling. English read out counters indicate hole foot units; metric readout indicate whole meter Units. A storage box for the unit while not in use can be furnished with the Leutert measuring device.

Main features of the Leutert Measuring Units Type „O“ are:

- light weight
- hard anodized frame
- replaceable measuring wheels
- direct drive counter with large resettable digits
